

Environmental Sustainability

Draft Policy Idea 9. Movement, Connectivity and Traffic

Explanation: We want to make walking and cycling in the Parish easier and more pleasant. One of the ways in which we can use our Neighbourhood Plan to do this is to identify our existing walking and cycling routes and opportunities for improvements that ensure that any new/future development does not harm our vision. Planning policy cannot be used to deal with traffic issues, however we have identified traffic mitigation measures as opportunities to make cycling and walking more pleasant.

Policy Intent: A policy which seeks to encourage safe travel by means other than the car and contributions for traffic calming measures and improvements to the pedestrian/cycling network.
