

A Thriving Village Centre

Draft Policy Idea 8. The Village Centre

Explanation: Tendring uses village centre boundaries as a planning policy tool to manage commercial, business and service uses. We think our village centre includes our open spaces and other amenities and how these are all connected with the commercial, business and service uses.

Policy Intent: A policy to establish our vision for the village centre so that new applications can consider this in the design of their schemes. Within that we'll also identify the village centre boundary to manage commercial, business and service uses which we have amended slightly to that proposed by Tendring.
